

Use [Scotranslate.com](http://scotranslate.com) in your Visual Basic or C#.NET project

Step 1

Add a web reference to <http://services.scotranslate.com/Translator.asmx> from within Visual Studio 2005 or 2008 called 'Scotranslate'

Step 2

Create an instance of the translator object

C#

```
Scotranslate.Translator MyTranslator = new Scotranslate.Translator();
```

VB.net

```
Dim MyTranslator As New Scotranslate.Translator()
```

Step 3

Create an instance of the translator object

C#

```
Scotranslate.Translator MyTranslator = new Scotranslate.Translator();
```

VB.net

```
Dim MyTranslator As New Scotranslate.Translator()
```

Step 4

Pass your string to the Translator object you just created and receive the translated text

C#

```
string translatedString = "";  
translatedString = MyTranslator.Translate(MyString);
```

VB.net

```
Dim translatedString As String = ""  
translatedString = MyTranslator.Translate(MyString)
```
